

# AGED FOREST MULCH

## TECHNICAL DATA SHEET

### DESCRIPTION

Aged Forest Mulch is an economical coarse grade mulch, which is ideal for broad acre and bush regeneration applications. A natural alternative sourced locally and 100% recycled organic product.

### PROPERTIES

- Passed through a 100mm tub grinder and tested to Australian Standards AS4454
- 100% recycled organic product that feeds your garden the natural way
- Promotes increased earthworm and microbial activity.
- Superior moisture retention characteristics increase water holding capacity in sandy soils and prevents drying & cracking
- Ideal for weed suppression and regulating soil temperatures in all garden applications

### APPLICATION

- Ideal for rejuvenating damaged soils- acts as a soil conditioner
- For optimum results spread to a depth of 100 – 150mm and reapply every 2 - 3 years
